MEMORANDUM FOR: Chief, PPS

SUBJECT: Killian Committee Report

1. Further progress has been made in the production of motion pictures for use in support of training programs. Final editing of the Logistics film was completed in May and it was released for use in appropriate courses. Production of the Dead Drops film, the fifth in the Clandestine Communications Series was begun on 29 September 1958. ^a The script on ~~the film covering~~ ^{the} Security ^{film} has been completed and is being reviewed by the Director of Security for final approval. Production should begin in about three months. A script for the film covering the activities of the DD/I is in preparation. During the reporting period, three films totalling 20 minutes in length were written and produced for use in the Management and Supervision courses. Also a special film of about 20 minutes in length was produced for the Office of Communications showing ~~the proper~~ techniques and procedures for loading and unloading ~~of~~ special equipment transported by cargo plane.

2. The Office of Training is faced with a rather serious problem in connection with the [REDACTED] The facilities [REDACTED]

25X1A

25X1A

[REDACTED] were constructed in late 1951 and early 1952. The buildings are temporary type construction involving an expected life of from 5 to 10 years. The point has been reached at which extensive maintenance costs will be necessary if the buildings are to be used for another 3 to 5 years. Consequently, a plan has been developed for conversion of all facilities to permanent type construction. The DCI

has approved in principle such conversion ✓ although the speed with which it can be accomplished will depend upon the availability of funds. If the program is delayed, we will be faced not only with high maintenance costs, but the possibility of rising construction costs.
